Our Mission

Our mission is to empower and strengthen our students' professional development through quality online healthcare education and training. Our organization's effort is to provide innovative learning opportunities to build career-ready professionals without losing respect for affordability, accessibility, and program length. We have meticulously developed distance learning education programs to provide flexible and accessible pathways toward career advancements while fostering a vision of leadership for you.

Who We Are

We are a group of educators who believe everyone can uplift his/her life through skillful training and education. Our online self-paced training courses are ideal for professionals seeking a change in their career directions, including college students, high school graduates, and foreign-educated professionals seeking entry into the US workforce.

HealthCareer Certs

We are committed to assisting our students in fulfilling their goals by providing affordable, accessible, short-term and career-focused online learning, which prepares our students to gain Allied Health Certification.

HealthCareer Certs online courses are interactive and include one-on-one instruction. Our study guides are based on exam content, and we have designed a number of online practice tests to simulate the actual exam. Students also receive powerful tools which provide personalized study recommendations derived from practice test results.

After completing the program, we will register you to take industry certification exam. By successfully passing the exam you will obtain nationally accredited allied health certification. We're here to provide you with the precise instruction and training that will empower you to succeed.

Our Certifications

Certified Pharmacy Technician (CPhT)

This 100% online course will prepare you for the PTCB and NHA national certification exam in as short as 12 weeks. We also help you complete an externship with a leading pharmacy chain. Pharmacy technicians play a crucial role in providing safe and effective patient care, including managing inventory, receiving prescription requests from patients and doctors' offices, accurately measuring medication amounts, establishing and maintaining patient records, and processing insurance claims.

[Learn More](#)

Certified Clinical Medical Assistant (CCMA)

Clinical medical assistants combine clinical and procedural knowledge, working across the domain of healthcare facilities to aid inpatient treatments and clinical operations. They are tasked with working directly with patients and supporting the work of doctors and other healthcare professionals. Our 100% online, self-paced course will prepare you to take nationally accredited National HealthCareer Association (NHA) exam.

[Learn More](#)

Certified Patient Care Technician (CPCT)

Take the first step towards a dynamic career as a CPCT. Our online self-paced course will prepare you for a nationally accredited industry certification exam in as little as eight weeks! CPCTs are in high demand, and they are facing increased responsibilities in their role due to a shortage of health providers in hospitals combined with the increasing rate of hospitalizations.
